The first Brigade of Second Division is expected to leave soon after.

Miami, Fla., July 26.—(Special).—There are seven hundred and fifty sick soldiers here, sixty-seven of whom have typhoid fever and half of the remainder are down with undetermined fever. While the situation is very unpleasant, no grave apprehension is felt.

Chickamauga Park, Ga., July 26.—(Special).—The expected movement of the Third Brigade, First Division, First Corps, did not take place yesterday. As it looks to-day the First Kentucky will get out this afternoon and the Fifth Illinois and Third Kentucky will break camp Wednesday morning, the former going out first.

This brigade will go to the front under command of Gen. Fred Grant, who was recently transferred to the command of this brigade from a brigade in the Third Corps.

The Third Battalion of the Sixteenth Pennsylvania Infantry, which was recruited and sent here after the regiment left for Charleston, will go to Porto Rico attached to the Fifth Illinois.

The First Kentucky, commanded by Col. J. B. Castleman, consists of 1,300 men and forty-nine officers. With this regiment will go the brigade headquarter and seven brigade officers, including Gen. Grant. This regiment will require thirty-nine tourist sleepers, one palace stock car, seven ordinary stock cars, sixteen flat cars and fourteen box cars.

The Third Kentucky, commanded by Col. T. J. Smith, consists of 1,210 men, forty-seven officers and carries with it sixteen civilian employees. It will require for its transportation three sleeping cars, thirty-eight tourist cars, eight stock cars, six box cars and nine flat cars. To this regiment will be attached the brigade hospital and ambulance corps.

It is understood it will be sent to Porto Rico. It is commanded by Gen. Fitzhugh Lee and includes the Nebraska regiment of Col. W. J. Bryan.

Ananias Not In It

When it Comes to Lying.

City of Mexico, July 26.—(Special).—The Monitor Espanol, the organ of the Spanish colony here, publishes an alleged dispatch from Washington saying Admiral Cervera accepted an invitation from President McKinley to call on him and the moment the Spaniard met him he shot and killed the President. Many Spaniards believe the dispatch.

Honolulu to be Fortified.

OUTBREAK IMMINENT

Spain's Troubles at Home Worse Than Those Abroad.

Sagasta Powerless to Either Carry on or Stop the War With America.

New York, July 26.—(Special).—The Journal's Hong Kong special says the Spaniards at Hong Kong and Manila are encouraged by reports that the Powers will not permit the United States to annex the Philippines. Attempts to buy or kill Aguinaldo have been revived with great vigor.

The Tribune's Paris special gives a letter dated Madrid July 23 to a French diplomat which says: "The situation is more critical than ever. Popular indifference to national disaster seems to continue."

"The slightest incident may precipitate a crisis and plunge the country into revolution. Sagasta is now powerless to carry on the war or to stop it. The discontent of the Republicans is spreading alarmingly at Cordova, Valencia, Murcia and Huelva."

"The Socialists are only controlled at Cartagena by soldiers, sailors and Camara's fleet."

Dr. S. Atwood Smith has announced himself a candidate for Congress in the Louisville district.

A violent earthquake in Chili Saturday night partially destroyed the towns of Concepcion and Talahuana.

The Alabama State election comes off next Monday and the Republicans are already crying fraud in advance.

The Vermont Democrats endorsed the Democratic platform and nominated Thos. W. Maloney for Governor.

A Louisville policeman named Weyler shot a man Sunday who rebelled against his authority. As a pacifier he proved more of a success than his Spanish namesake.

Capt. Gen. Augusti telegraphs from Manila to Madrid that "grave events are impending." Don't make it a grave event. Take them out to sea and bury them.

The reported attack of Gen. Garcia's men on a troop of Spaniards coming in to surrender, is officially denied by Gen. Shafter. The story was a pure fake.

It is reported from White Sulphur Springs that Mrs. Marie Ransom, a Louisville widow of the 400 set, will shortly be married to Baron Von Norde, an Austrian nobleman of 60 years.

A message drawn up at Madrid, it is said, will ask for an armistice to talk about terms of peace. Spain evidently wants to cry "enough" before we capture and occupy Manila and San Juan.

The German Ambassador Mr. Von Holleben, has called upon President McKinley with a personal message from the Kaiser, that was "very gratifying" to the President. It was the most important event of the month in war matters.

The Spanish judicial officers of Santiago, who have been retained in office, have now resigned upon being informed that they must recognize American sovereignty. This now opens the way for the appointment of Cuban officers if suitable persons can be found, and 2,000 Cubans of Santiago have petitioned the President to this effect.

A crowd of soldiers at Jacksonville did what they called the "Chickenhawk Act" Sunday. They made a raid on a lemonade stand whose proprietors had incurred their displeasure and after seizing everything eatable, smashed up the property and ended by tossing the colored waiter in a blanket.

The electric railway in Madison, Ind., is trying the experiment of female conductors on the street cars. There are five of them, all of good looking young women and their uniform is a black bicycle suit, with waists like, and the word "conductor" on their caps. The receipts have increased 20 per cent under this rule in Chillicothe, O., the only other town in the country with female conductors.

No Holiday in Clarksville Men.

The Tobacco Board of Trade had a meeting this morning at the Tobacco Exchange to decide whether they would have a two weeks' vacation this summer or not, says the Clarksville Times. It was put to a vote and a majority were in favor of not having the vacation, but to take one day off and have a picnic. So they all agreed to this, and next Monday has been set for the day. They will have a big barbecue and picnic at DuBar's Cave.

PORTO RICO.

Something About the Rich Little Island Soon to be Ours.

About Five Times as Big as Christian County and Richer Than Cuba.

That little box of an island, Porto Rico, lying southeast of Cuba, with San Domingo intervening is only about 100 miles long (east and west), and 40 broad. But it is so packed full of riches that a population of 800,000, generally lazy, illiterate and unskilled, are able to pay \$3,000,000 tribute to Spain each year, support a Spanish army and a horde of Spanish officeholders, and live very comfortably there.

Porto Rico has had a stormy history since Columbus discovered it in 1493, or, more accurately since Ponce de Leon founded its present capital San Juan, in 1510. He began with a terrible slaughter of natives and Spain or her enemies have kept war and cruel oppression a chronic condition there ever since.

Its population, according to the census of 1887, the latest, was 806,708, of whom about 450,000 are white, 240,000 mulattoes and 7,500 negroes. Only one in eight are classed as "literate," but a majority of those can only read, not having reached the advanced stage of learning which affords them the joy of writing.

Physically, the island presents a variety of conditions, which would not be looked for on such a modest bit of territory, to one accustomed to the large scale of topography prevailing in this country. A mountain range runs from coast to coast, east and west, rising in the eastern district to a height of 3,680 feet, and the deep canons cutting down to the Caribbean Sea on the south, and the Atlantic on the north, are sources of innumerable water courses, no less than 40 of them being large enough for inland navigation by small trading craft.

The country on the northern slope of the mountain range is as rich agriculture land, it is said, as is found anywhere in the world, raising the maximum of crops with the minimum of cultivation, while to the south of the mountains the lands require artificial irrigation to produce good crops. This great difference in so small an area is all the more remarkable, as in the "wet" portion of the island the average annual rainfall is 64 inches.

Spaniards have been cultivating the land for nearly four centuries, and they exterminated a people who were wise in the arts of agriculture, yet to-day only a very small portion of the available land of the island has ever been cultivated, chiefly, it seems, because there are no roads by which produce can be carried to shipping points, except over the rich lowlands near the coast.

But even under a system calculated to make a Yankee farmer groan for the waste of possibilities, the Porto Ricans raise enormous crops of variety, which satisfy a child's dream of tropical goodness. Here is a list of the principal crops: Sugar, molasses, tobacco, coffee, rice, cotton, maize, plantains, oranges, bananas, pineapples—and a score of other fruits—honey and coconuts. They "mine" and export salt, as well as sugar, building stone and marble, and it is known that the hills contain gold, copper, tin, lead and iron, but the inhabitants lack the skill, enterprise and capital to develop these mineral riches.

The climate of Porto Rico is much superior to that of Cuba. But even at the hottest it is not vexed with much humidity, the air being kept generally free of moisture by the prevailing northeast wind.

But Porto Ricans are more sensible about accepting weather conditions than we are in our hot days. They act on the belief that they

will do more work in the course of the year if they do so at all when the sun is fiercest, for three hours in the middle of the day when the thermometer is highest they cease all work. Even at other hours, they go about the struggle for life in a leisurely manner. As little as the Cubans have, by our standards, the Porto Ricans have less.

This is shown in the lack of energy they display in their periodic attempts to free themselves from Spanish rule. They have attempted this often, but have always given up after a struggle which would only have encouraged the Cubans. Among the white natives there is the large number of 25,000 who are not of Spanish descent, and among these it is interesting to note that the rebellious feelings against Spain are aroused more by social than political wrongs.

So there is the little island, a thousand miles from Key West—half the key to the Greater Antilles—soon to be American territory, and have her \$25,000,000 yearly commerce doubled in a brief time for the greater glory and profit of its captor and liberator—Uncle Sam.

POST-DISPATCH SNAP SHOTS.

Should theodor Leiter have to borrow any more millions to cover the junior Leiter's grain losses he will perhaps make the new loan a popular one.

Putting a dummy baby into a baby carriage and tumbling it for a bluff just to hear a lot of women scream and "take on," is the Chicago idea of a joke.

There would be fewer suicides if people could be used to see what possibilities there are that they will make themselves ridiculous in their attempts to shuffle off.

The Chinaman who has allowed his tenant six months' shelter without collecting rent is not a bad landlord. There are Christian landlords who have at times been less considerate.

The naughty holder of a \$20 war bond is not disposed to sell at a low premium. His idea is 5 per cent at least. What sort of a financier would he be to begin his bond speculation by undervaluing his possessions?

The genius of Frank Popp, the thief who has been stealing from the Joliet penitentiary, should have been born to a better field. He should have been the trusted head of some great financial institution, with large sums to reach for.

A New England banker stole \$640,000 "under the eyes of a double set of examiners, State and National." Examination does not examine and inspection does not inspect. There must be some new scheme if such secondaries are to be caught in time.

The Indian man who preferred wood alcohol to whisky is dead. It would be better, perhaps, if drinkers, when they want a change, were to resort to coal oil, as a Georgian did some years ago. Such a substitute would also help poor Mr. Rockefeller in his business.

It surpasses the Assyrian empire in wealth, the Roman empire in population, the Spanish empire in power and the Persian empire in area—all of which empire have passed away. The population of the empire—402,515,000 is 27 per cent of the population of the world; the 11,839,816 square miles of imperial territory is 21 per cent of the land of the world.

RELIABILITY

is a quality some newspapers have lost sight of in these days of "yellow" journalism. They care little for truth and a great deal for temporary sensation.

It is not so with THE CHICAGO RECORD.

The success of THE RECORD rests upon its reliability.

It prints the news—all the news—and tells the truth about it.

It is the only American newspaper outside New York city that has its own exclusive dispatch boat service and its own staff correspondents and artists at the front in both hemispheres.

It is the best illustrated daily newspaper in the world.

Its war news service is unapproachably the best.

Says the Urbana (Ill.) Daily Courier:

"We read the war news in the other papers, then we turn to THE CHICAGO RECORD to see how much of it is true."

Sold by newsdealers everywhere and subscriptions received by all postmasters. Address THE CHICAGO RECORD, 184 Madison Street, Chicago.

POST-DISPATCH WAR NOTES.

To die is the regular thing with the regular. The volunteers look only to a temporary risk.

"Spain for Spaniards" is a good policy. The United States is about to approve of it by sending Spaniards back to Spain.

Santiago has entered on a boom the like of which she never saw before. Manana will hereafter be an unknown word there.

The war poets will now take a fresh start. Doubtless a thousand haikus of new poems are already on the way to unhappy newspaper editors.

Missouri is more or less unhappy because no Missouri regiment marched into Santiago. Our boys have not had half a chance in the war.

The making of Santiago by the Spaniards before its surrender was something to be expected. It would have been unspanish had they done less.

The foolish populace of Madrid has constituted itself a board of strategy and it finds an easy task in criticizing both the army and navy of Spain.

Diederichs would better be looking up some trustworthy hair restorative than to be scolding about in Manila waters and endangering the whole world's peace.

There is an unlimited demand for provisions in Cuba, and Uncle Sam's generosity seems likely to be heavily taxed. The "square meal" is a novelty to so many in the island that it must now be the height of luxury to them.

If Cervantes knew when he set out from Spain that the Spanish Government had betrayed him and that guns intended for his fleet were in the contractor's pocket, why did he not speak out and refuse to go? An American or English Admiral would have done so. It would have been both manly and wise.

Historians have long claimed that fate had reserved a Shofur for the cruel Duke. They certainly merit it and therefore cannot afford to Tampa with courtesy, even with intrenchments several miles long. Pseudo monism is sure to follow such an attempt, nor Doherty wonder at this, however Schley their generals may be. Even Granting them plenty of Lee-way, they have no chance against us, no matter what our the taps.

Geo. Wilson is justly praised for leaving the glory of Santiago to Gen. Shafter. Nothing so becomes a great soldier as a proper recognition of the merits of his subordinates.

The record that is made, to no popular ed is not worth making.

THE IRISH NATURE.

A Few Specimens of the Genuine Celtic Wit.

A curious peculiarity of the Irish nature is the wide limits to which relationship extended. "Do you know Pat McHugh?" a peasant was asked. "Of course I do," was the answer. "Why, he's a near relation of mine. He wance proposed for my sister Kate." When faction fighting was rife in Ireland, it was a man's interest to "increase his following" by extending the number of his relations by the possible device. Happy faction fighting is dead in Ireland, and a man has no need now to have behind him a long line, not of "ancestors," as Sir Boyle Roche would say, but of "relations," as was imperatively necessary when the "blacks" were accustomed to "should discussions with the kers" at every fair. It is after he is dead that his relations "come in handy" to the Irishman. They give him a "grand buryin'." "Well, Mary," said a friend of mine to a domestic who had been attending a "buryin'" "had Mat Malone been a 'crisp?" "Oh, he had a great wain, sir," and Mary, "And wouldn't he? Wasn't he related to the whole barony? Faith, it reminded me of a land league meetin'." A child went crying to its mother and reported that it had swallowed a button. "Well, well, look at that now," cried the woman. "Degrade, I suppose the next thing you'll do is to swallow a buttonhole!" This story reminds me of the graphic description given by a beggerman of his tattered coat. "Faith, yer honner, it's nothin' but a parcel of holes sewn together."

It often seems in Ireland as if words are not quick enough, or the they form too cumbersome a vehicle for the rapid and rushing thoughts of these active-minded peasantry. A laughable instance of this occurred during a recent visitation by Dr. Walsh, the Roman Catholic archbishop of Dublin, to a remote parish in his archdiocese, the story of which I was told by the priest. An old woman hobbled up to his grace as he was passing through the village, and exclaimed: "Wish, now that I've seen your lordship, ye may die, and the Lord be praised!" "You were, needless to say, her own death the last lady desired, after the great privilege of having seen a live archbishop. The same clergyman told me that he has a parishioner who is much addicted to drink. Meeting the man one day, when, as the people say, 'he had a drop in,' the priest inquired that he should take the pledge, for it was the only protection against the temptations of the public house. 'You've never seen a teetotaler drink, Tom,' said the priest. 'Ah, your reverence,' replied Tom, 'I've seen many a man drunk, but I couldn't tell for the life of me, whether they were teetotalers or not!'

An Irishman got out of a train at a railway station for refreshments, but, unfortunately, the bell rang and the train went off before he had finished his drink. Running along the platform after the train, he shouted: "Hould on, there; hold on! You've got a passenger aboard that's left behind!" A poor woman who had a son of whom she was very proud, unintentionally paid him a very bad compliment. Speaking of the boy to the priest, she said: "There isn't in the barony, yer reverence, a cleverer lad nor Tom. Look at him, yer reverence," pointing to two small chairs in the cabin, "he made them out of his own head; and, faith, he has enough of wood left to make me a big armchair!"—London Spectator.

BREAD RIOTS.

Some Serious Disturbances That Occurred Over a Century Ago.

The world has seen many bread riots. In 1756, when harvests all over the world were short, wheat went up to the equivalent of \$1.50 a bushel, and in England there were insurrections on account of the scarcity of bread. In 1767, when the price of wheat rose in Mark lane to the equivalent of \$1.80 a bushel, there were serious disturbances all over England, and great violence was done by the starving populace. In 1775, when the price of wheat again went to an almost prohibitive price to the poor it was necessary, in France, for the troops to guard the markets, and a general insurrection was only kept down by the prompt massing of the troops in the disaffected and suffering places. The world well knows what a formidable part was played on the eve of the French revolution by the rise and bread riots, and it will be readily recalled how frequent since that revolution were the expressions of popular hunger and despair up to the time of the enormous expansion of the American grain production and the fall in agricultural prices. It is most pitiful to think of people driven by want to the cry for bread, a cry which, if made too insistently, is answered with bullets.—Indianapolis News.

SLASHED HIS ARM.

Ed White Attacks Clinton Boales With a Knife.

A Gash Nine Inches Long Laid Open in His Right Arm —Not Dangerous.

A cutting affray occurred at 2:15 o'clock on South Main street, near Tenth, the participants being two colored boys named Clinton Boales and Edwin White.

White went up to Boales and began what appeared to be a scuffle, a species of disorder on the streets that has become entirely too common in that part of the city. Crowds of colored boys obstruct the sidewalks playing and pushing each other about to the great annoyance of the merchants. The affair this afternoon is one of the fruits of this idling on the streets.

When White took hold of Boales the latter protested and after telling him repeatedly to turn loose finally struck White with his fist.

Quick as a flash White struck with an open knife in his hand and the blade descended on the right arm of Boales.

His coat and shirt were cut open and a gash nine inches long disclosed on his arm, which fortunately was only deep enough to draw blood and not of a serious nature. White immediately took to his heels, but was pursued and captured. Numerous eye-witnesses were present and it was the unanimous opinion that White was to blame from the start to finish. He is a son of George White and is about 16 years of age.

The Heavy Rains.

About three-quarters of an inch of rain fell prior to the report at 7 a. m. to-day, and rain has fallen steadily nearly all day. The rains appear to be general and wheat threshing will be set back for at least another week, and maybe longer. Fully half the crop is still in the shock.

NEWS FROM CAMPS.

Sickness and Death Among the Soldier Boys in Camp.

Several Succumb to Disease After Escaping Spanish Bullets—Heavy Railroad Business.

A Southern Detail at Last.

Washington, July 26.—The War Department has decided to send the First Florida, Second Georgia and the First Maryland regiments, now at Tampa, to Porto Rico.

Lexington, Ky., July 26.—The Cincinnati Southern has hauled 55,000 troops since war was declared. In the movement of troops from Chickamauga to Newport News for Porto Rico the road handled 5,200 troops and 342 cars.

A Soldier Dies at Ft. Thomas.

Cincinnati, O., July 26.—Private Walter Lee, Company G, Second Georgia volunteers, died to-day of typhoid fever in the Fort Thomas military hospital. He was one of the number who were received from the South on Friday last. He was attacked by fever at Chickamauga.

Lieut. Fiscus Will Die.

New York, July 25.—All hope of recovery of Lieut. William M. Fiscus, of the Second cavalry, who is at Fort Wardsworth suffering from typhoid fever, has been abandoned. He was one of the six officers who came North from Santiago a week ago Saturday.

Another Accidental Death.

Huntington, Ind., July 26.—Ex-City Marshal A. J. Rosenbrough telegraphs from Chickamauga that he has started home with the remains of his son, Frank, private of Company K, 10th Indiana volunteers, who was killed by making a high dive into shallow water, his head striking a stone and causing concussion of the brain.

Slow in Getting Off.

Washington, July 26.—There were five transports at Newport News yesterday. Two others are expected from New York to-day, the Harvard will arrive Thursday, two will arrive Saturday and four or five next Monday. The leaving time of Gen. Grant's brigade with its two Kentucky and one Illinois regiments will depend somewhat as to the time it takes to embark the troops already at Newport news.

A Kentuckian Dies in Camp.

Princeton, Ky., July 26.—Dixie Satterfield, of this county, received a telegram yesterday announcing the death of his wife's brother, Ed Wood, at Miami, Fla., of fever. He studied law here for months, and was well-known and popular. He went to Louisiana, his old home, a year ago. At the breaking out of war with Spain he joined the Louisiana volunteers. His remains will be brought here.

Typhoid Fever Increasing.

Washington, July 26.—The authorities continue to be greatly alarmed over the typhoid fever situation at the camps. To-day sixteen men were taken down by the disease and sent to the hospitals at Fort Myer from the two division hospitals. This number of cases is the largest sent out of camp since the fever made its appearance and at a time when the disease was supposed to be well under control. The hospital authorities are greatly alarmed at the increase.

Two Deaths at San Francisco.

San Francisco, July 26.—Sickness among the soldiers here is increasing. In the division hospital are 308 patients and in the Presidio barracks soldiers, forty-five, a total of 353 soldiers, not counting, perhaps, a hundred less severe cases in regimental hospitals.

Dewitt L. Tucker, a private in Company L, Fifty-first Iowa, died Sunday of pneumonia. The remains were taken back to Council Bluffs for burial.

Joseph Baker, a private in Company B, First Tennessee, died at the hospital of dysentery.

Several men in the hospitals are in a critical condition. Two cases of varioloid have been discovered in the Seventh California. These men will be completely isolated.

HOWELL HAPPENINGS.

Items of Interest Gathered up by a Capable Writer.

Howell, Ky., July 25.—I have seen nothing in your paper from our little wayside village for some time until your worthy correspondent headed his letter "Howell" but signed himself Pee Dee and Herndon, and gave us the news from those points which was very interesting. Let us hear from him again.

Miss Mary Embury, who visited in the Pee Dee vicinity, returned to her home in this place some time ago.

Miss Carrie King, of Church Hill, who visited Mrs. Dickerson, near this place, has returned home, much to the regret of some of the boys.

Misses Adams and Oakes, of Daysville, who spent several weeks with Miss Mattie May Radford, have returned home accompanied by Miss Mattie May, who expects to be gone for some time.

Rev. Dr. Harvey, of Louisville, is expected to preach near this place at the Baptist church, (Olivet) on Sunday night, July 31. The protracted meeting will begin at that church Sept. 18. Rev. Weston Bruner, of Baltimore, will assist. There is some talk of refurbishing the church with new carpets, pews, chairs, pulpit, etc. Nothing has been done as yet however. The prayer meeting is well attended by attentive congregations. The racing, children's day, etc., which our neighboring scribe refers to, fortunately have not struck our place.

The rains have been general and I need not dwell upon the weather. Suffice it to say it has greatly retarded wheat threshing and injured tobacco, but has been helpful to corn, fallowing, cleaning fence rows and pastures.

Misses Bessie Waller and Daisy Williams, of this place, are taking a little sojourn with Mrs. F. M. Quarles, at her country home near here. Howell has been very fortunate in having so many pretty girl visitors this summer. Seems as if it is quite a favorite country resort.

The question of locating the public road from Howell to Bell is being agitated very much now; some want it just north and some south of Howell. It will doubtless be settled soon.

He will make a careful and complete investigation of the smallpox cases now raging in Jackson, Laurel and Clay counties and will do whatever is needed to stamp out the disease. In Laurel and Clay counties the disease is under control and it is believed that very soon every vestige of it will have disappeared from those counties. In Jackson county the disease is still raging and many cases are reported from there.
